

WHITE PAPER

GALERIA META

TOKEN

Mission:

To provide income and job opportunities to investors and entrepreneurs by producing trading platforms and business solutions in the real and virtual reality fields.

Vision:

To combine both the traditional and modern financial structure into a new open and transparent opportunity to generate a truly decentralised (Defi) cryptocurrency funded hedge fund.

Over a 4 year period the aim is to move from asset accumulation to revenue generation, transforming the project from a token-based utility to an NFT-based format that leaves all remaining participants with potentially life-changing passive income.

Values:

Transparency and fairness.
Confidence based on competence.
Fundamental value, not hype.

The Problem with the World of Finance:

In the last decade, the entire global financial landscape has changed irrevocably, completely turning the traditional financial world upside down.

The shift from centralized to decentralized, digital has brought the most surprises. Decentralized financial services and platforms have not been able to move on to anything other than just holding funds, as the centralized financial sector is rapidly starting to give way to blockchain technology.

Nfity Galeria will create solutions that will provide investment and business opportunities by solving such problems and establishing new business areas.

Your Participation Invite:

Nfiti Galeria is intended as an opportunity for a professional, like-minded community wishing to share their successes together. This project is for informed, patient individuals comfortable with making the journey with us, as Nfiti builds the tools necessary to bridge the gap between the elite members of our society and the rest of us. We make no promises, we make no false claims, sometimes our returns may dip but we are confident that our compounding model will return a passive income comparatively unrivalled in this space.

Please understand up front: success for Nfiti Galeria is not solely measured by token price. Rather, it is measured by the longevity of the project and the consistent, market-beating returns that we aim to achieve. We truly want to share our achievements as broadly as possible.

Nfiti Galeria is taking a unique approach in this new world of block chain and DeFi.

Project Mechanics:

Nfiti Galery Meta is a Metaverse project.

It is a virtual reality environment where many halls are available for investors.

Investors can rent these halls, exhibit and sell their NFTs as they wish.

They can also participate in live auctions and auction-style sales from anywhere with VR virtual reality.

Many concert venues and ticket sales for famous artists and organizers will be available at Nfiti Gallery Meta.

There will be many music platforms where artists can easily exhibit and sell their nft music pieces. Many competitions and organizations will be held in these halls.

In Nfiti Meta Game halls, award-winning tournaments will be held in which players can compete fiercely with nft game characters. Special presentation rooms will be available for game developers. There will be Nfiti Gallery Special halls for NFT artists to showcase their Premium NFT collections.

There will be NFT markets and Opensea Rarible access for standard nfts
